Receipt is acknowledged of the Amendment with Drawings filed January 18, 2005.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Hamasaki et al. (US 5,694,065, "Hamasaki", hereinafter).

Regarding claim 15, Hamasaki discloses, a circuit, comprising:

a buffer (IV1, IV2);

a sampling circuit (IV0) having a switch (50, 60); and

a damping circuit (LPF1, LPF2) coupled between the buffer and the sampling circuit; wherein the damping circuit is adapted to reduce charge glitches when the switch closes (see abstract).

Regarding claims 16 and 17, Hamasaki discloses, that the damping circuit comprises a low pass filter (LPF1, LPF2) and the low pass filter is an RC low pass filter (Rn, Cn; Rp, Cp).

Regarding claim 20, Hamasaki discloses that the buffer includes a transistor (74, 84) having a source (inherent); and a current source (72 or 82) coupled between the source and a voltage supply (32, 34)

Application/Control Number: 10/626,701

Art Unit: 2819

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 19 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hamasaki.

Hamasaki discloses all of the claimed invention as discussed above but does not disclose that the transistor in the buffer having a source coupled to the body.

However, it is well known in the art that it is common practice to couple a source to the body of a transistor to reduce a signal dependent current. Therefore, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to have a source coupled to the body of the transistor of Hamasaki in order to reduce a signal dependent current.

Allowable Subject Matter

Claims 18, 23-33 are allowable over the prior art.

Claims 21, and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed 1/18/2005 have been fully considered but they are not persuasive.

Application/Control Number: 10/626,701

Art Unit: 2819

Applicant argues on page 8 of Amendment filed 1/18/05 that, "switches 50 and 60 are not even capable of storing a charge of a sample." However, the limitation of which the Applicant relies (i.e., storing a charge) is not stated in the claims. It is the claims that define the claimed invention, and it is claims, not specifications that are anticipated or unpatentable. Constant v. Advanced Micro-Devices Inc., 7 USPQ2d 1064.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel D. Chang whose telephone number is (571) 272-1801. The examiner can normally be reached on Monday through Friday.

Art Unit: 2819

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael J. Tokar can be reached on (571) 272-1812. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
